

HOW TO THINK "THE WHY" OF CISSP

★ created by Dave Krunal

(CISSP As An Art)

The question is not
how to
pass CISSP

The question is

why I
want CISSP

WHY

is powerful than

HOW

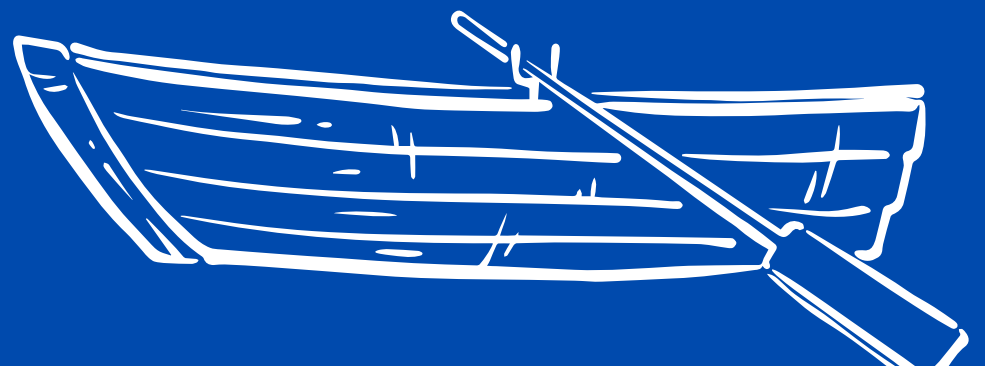

why is

vision

how is

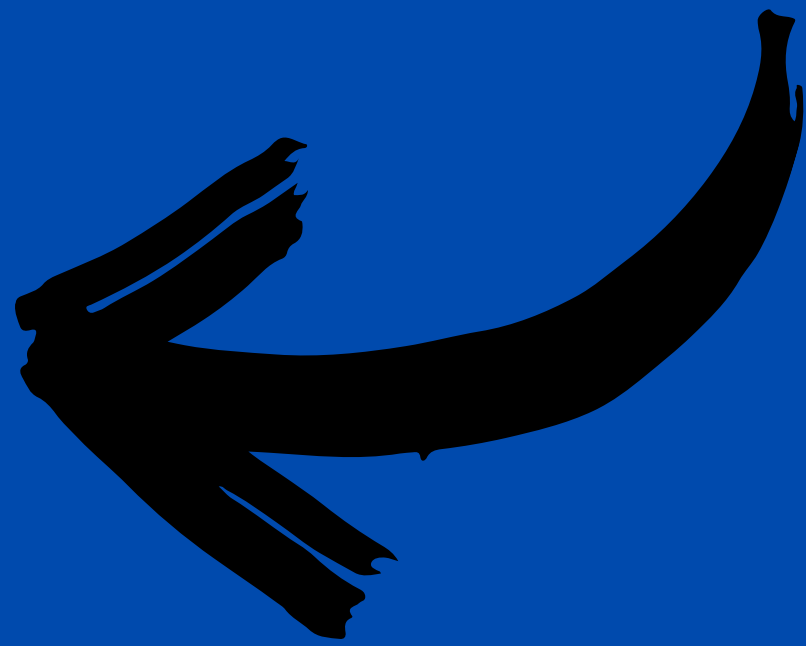

mission

The outside-in
triggers are for job
security, promotion,
stress and status.

World

You

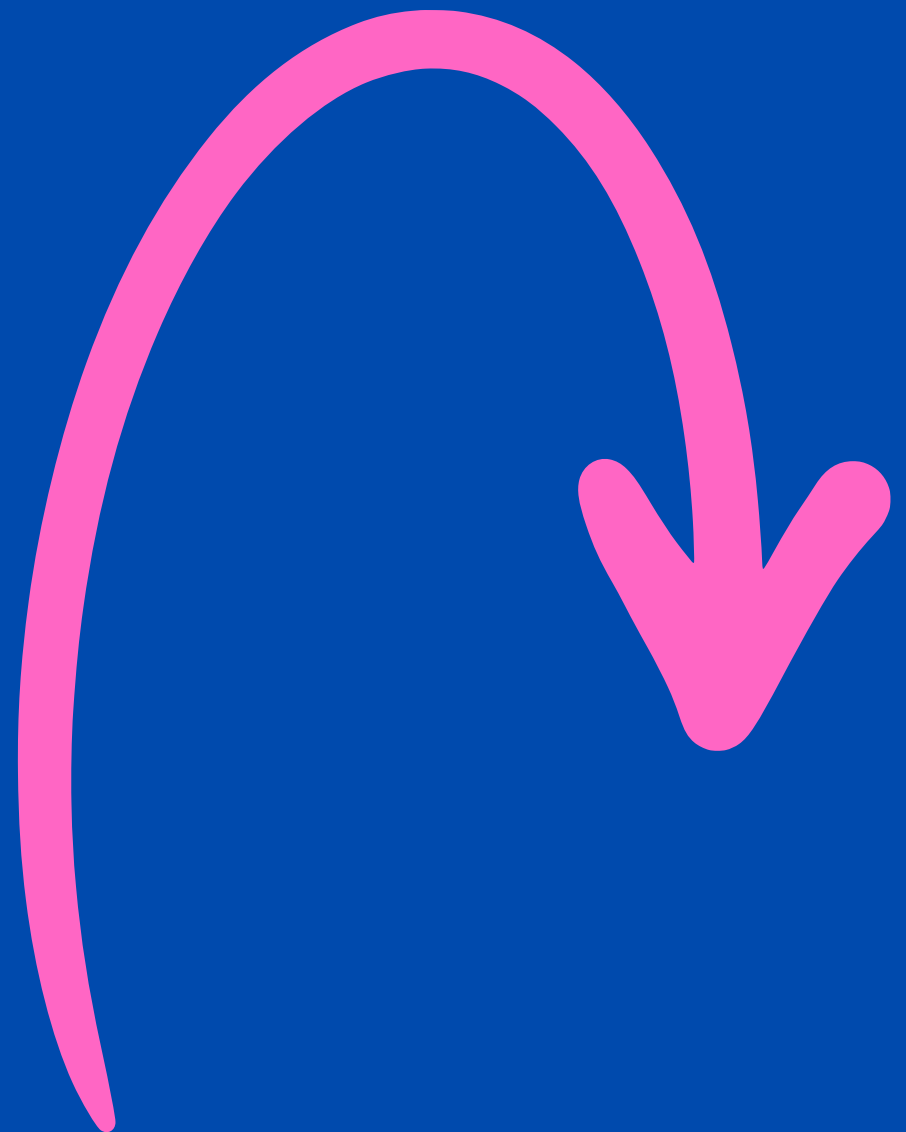

The inside-out
curiosity is hunger
to learn, calm, to
know and to share.

World

You 

Continue if you
are inside-out
if not
make
U
turn

You should not be

SAME PERSON

after reading

CISSP

you, before

you, after

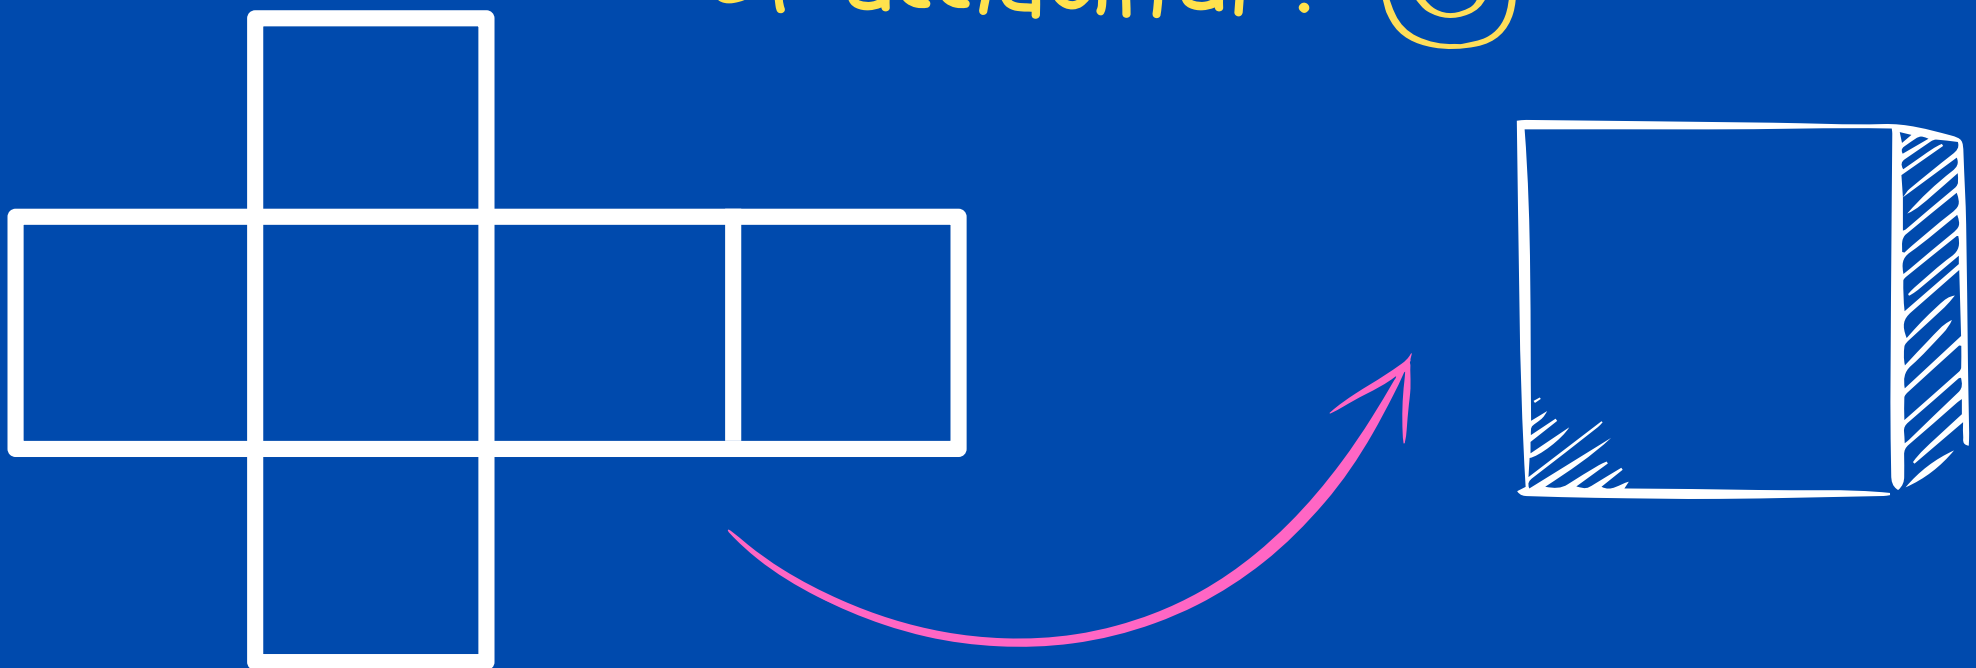

My biggest motivation to
pursue CISSP was to
enhance my perspective.

still in progress... 😊

—
before
CISSP

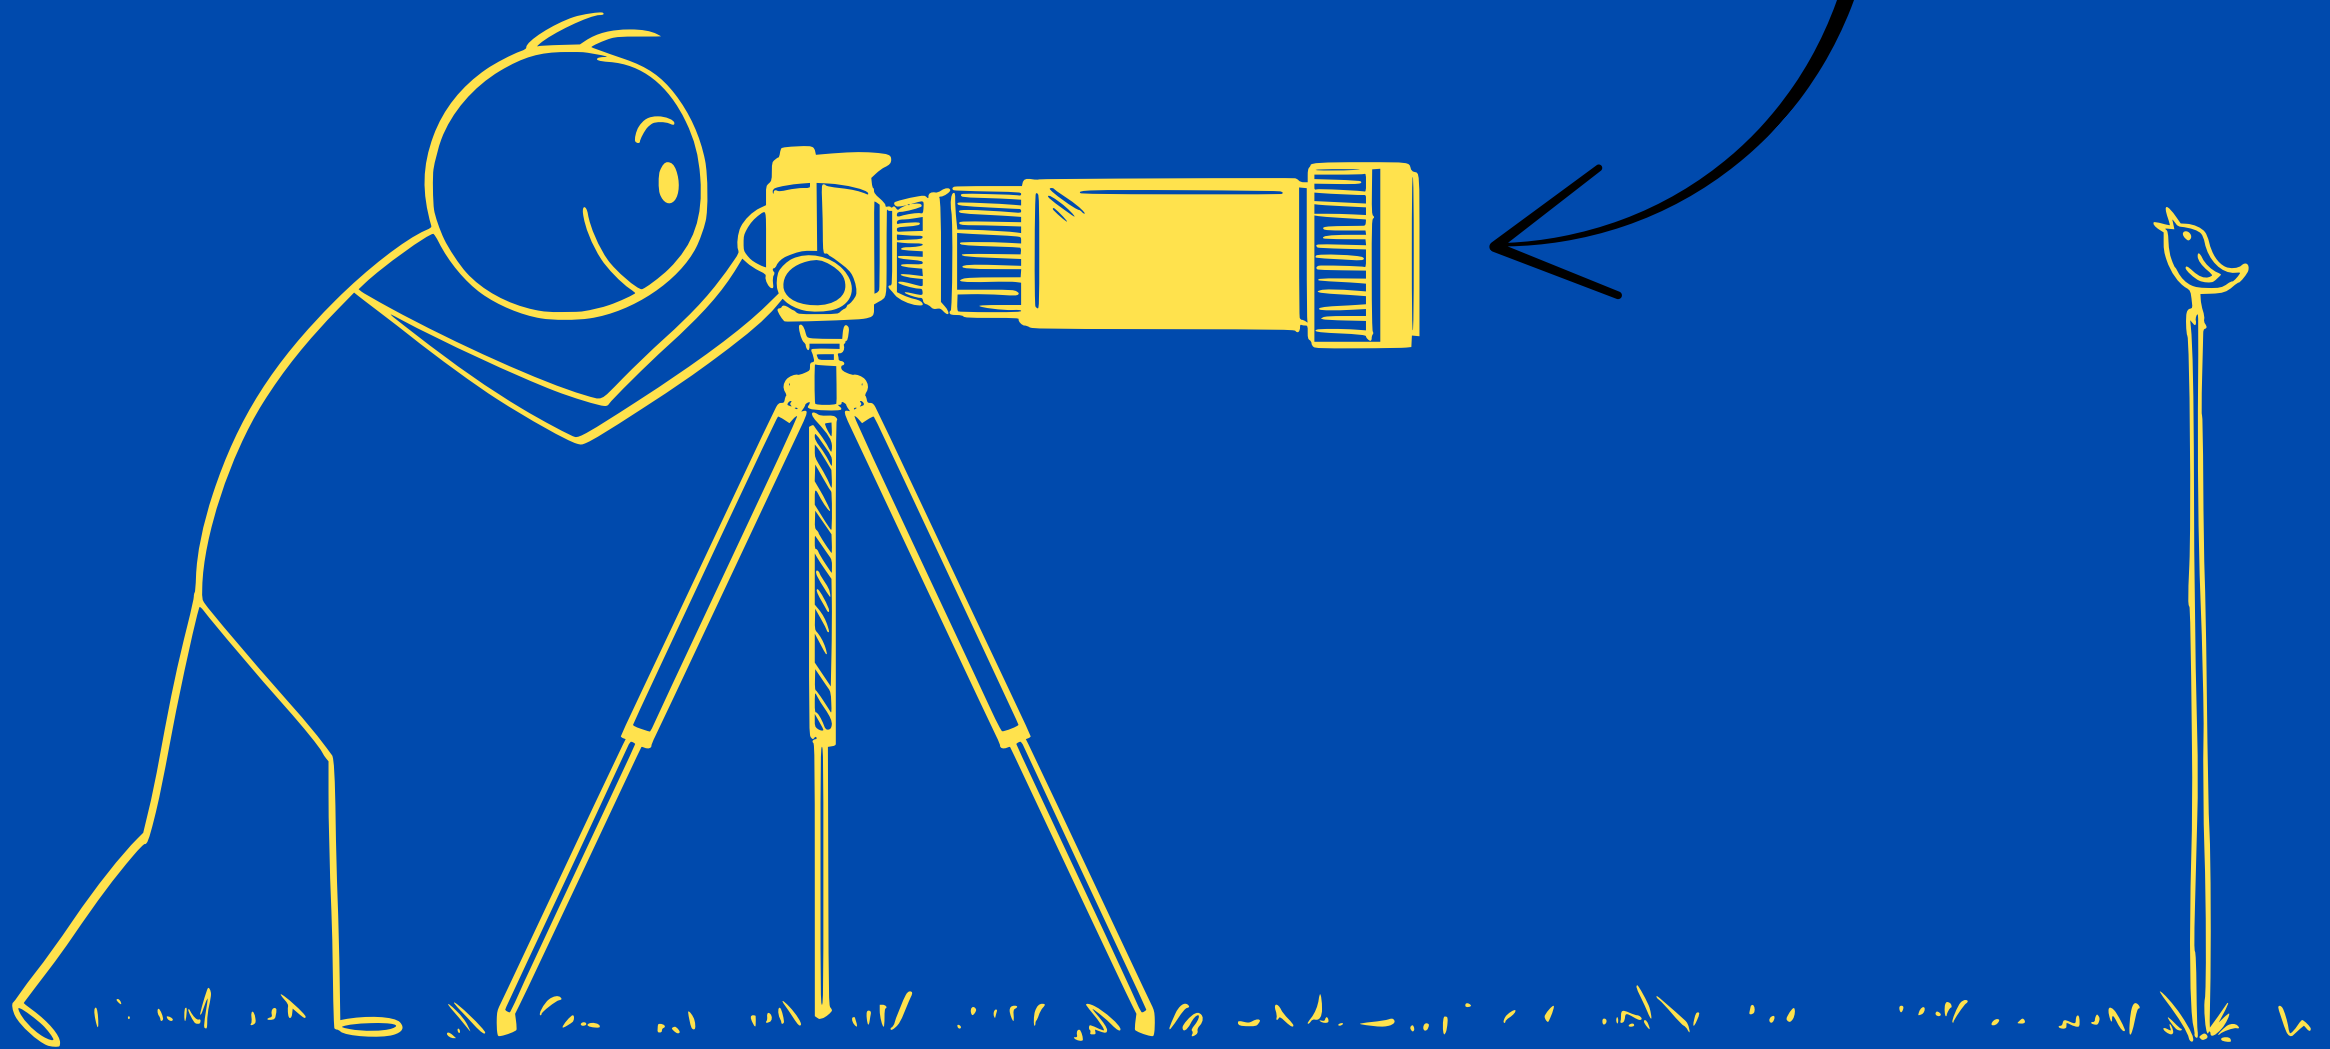

after
CISSP

Genuine curiosity
often leads to
self-discovery
or accidental? 😊

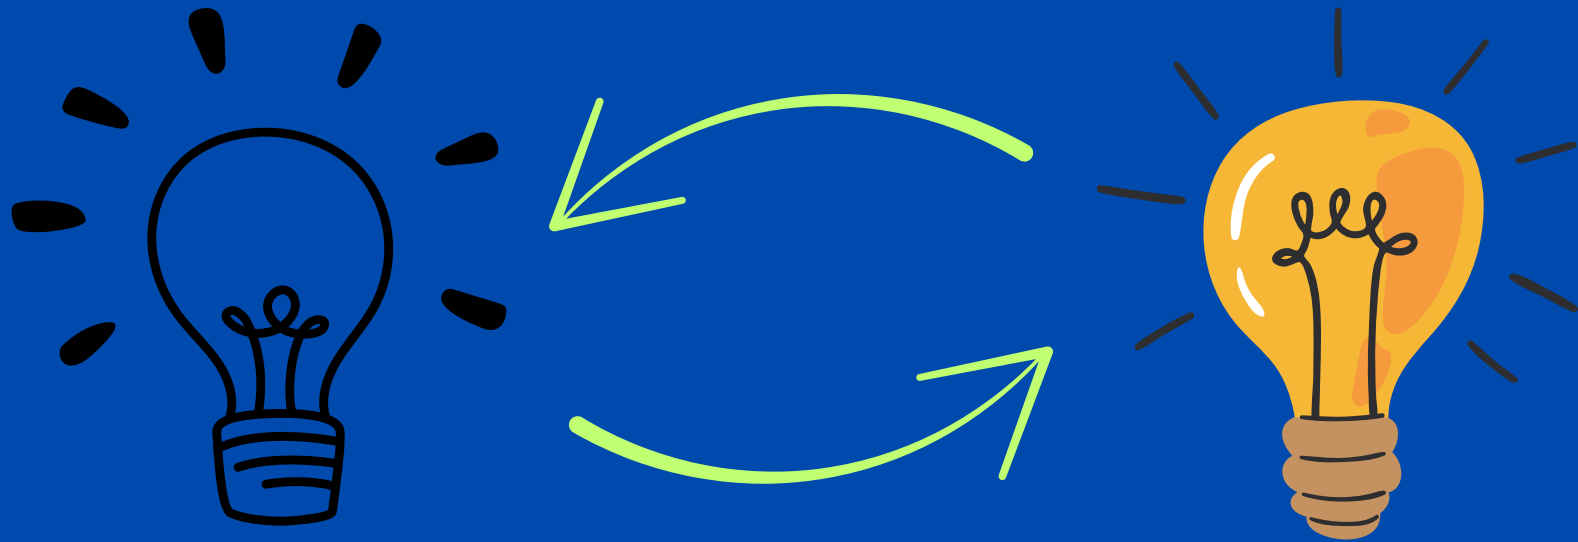

Think CISSP as a
self-discovery tool

I discovered my creative
lens to express art and
simplicity through CISSP

I create the way I feel.
I teach the way I learn.

I did not invent
CISSP As An Art

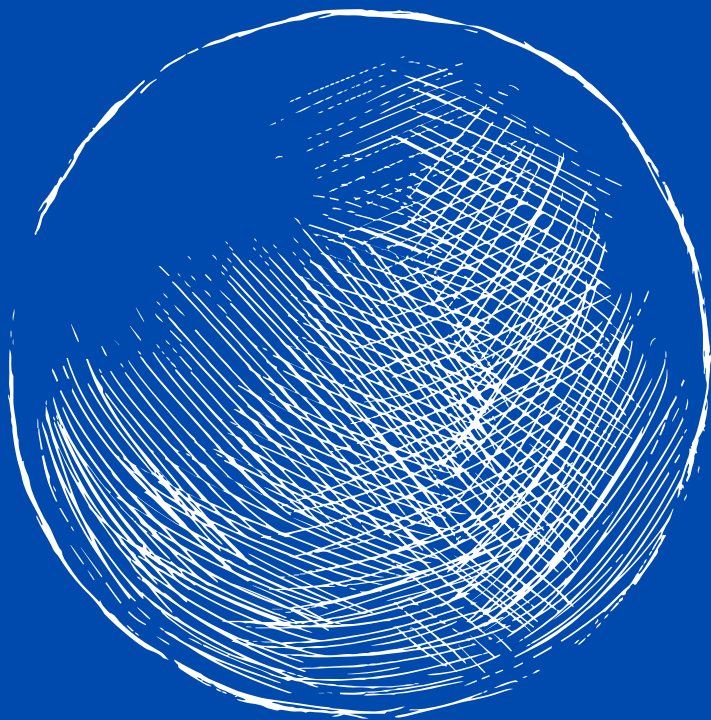

CISSP As An Art
invented me.

Now, it's my **WHY** to
continue the journey.

find your WHY
before you act on HOW

Don't start
to become
this

Till you
deal with
this

WHY is system
HOW is goal

Don't start
to stop

Start to
begin

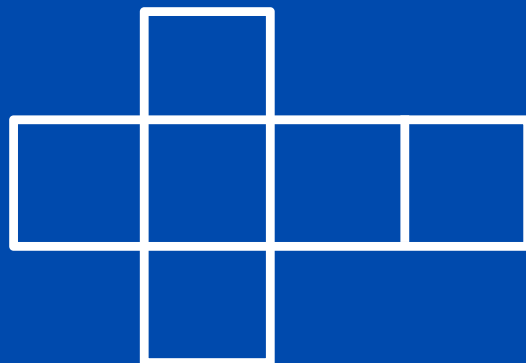

Transform

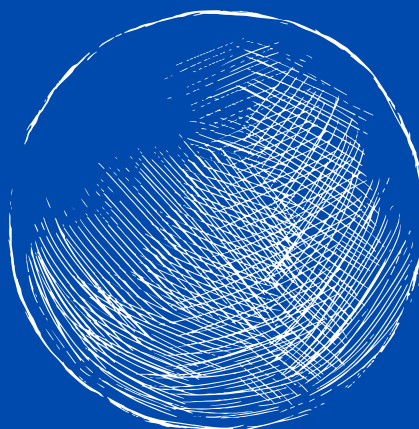

Enhance

Discover

find why,
not how

Do a small favor for me..

Please share.

If this mini creative CISSP
booklet is useful and give you
clarity on thinking.

I'd like you to join me (see next)

JOIN THE TRIBE

I blend cybersecurity with art,
creativity and storytelling.

Join **CISSP As An Art**
(CaaART) for more sketches +
email insights.
